Aquadeck *E series*

Aquadeck, the best protection available

- **Safety Guaranteed**

An Aquadeck cover, like every Delta cover, is the best available means of preventing accidental falls into a pool.

Aquadeck complies with every stipulation of the French standard NF P 90-308 and allows you to enjoy your pool with complete peace of mind.

Aquareva System

The little "Extras" that make all the difference

Procopi allows you to harmonise the colour of your cover, your liner and your pool fittings.

Aquareva System is a software tool that shows you your pool before it's even built.

(the simulation is limited to Coverdeck for the moment).

"What would go best with a beige liner? Beige or white pool fittings? And what would a grey cover look like? And if I went for a more daring contrast?" A few clicks will answer all your questions. Easy, convivial, Aquareva System is child's play. You can make an informed, confident decision, and choose the colours that will give your pool its character.

- **Temperate water**

Aquadeck shelters your pool against cool nights and cold gusting winds. You can begin your pool season in early spring and extend it into late Indian summers.

With Aquadeck, Summer lasts longer

- **Pure water**

Aquadeck covers have an opacity coefficient that inhibits photosynthesis and hence the growth of algae. Your pool water is cleaner thus economising filtration time and water treatment products.

- **A simple, cleverly designed system**

Aquadeck is a Delta cover, designed and manufactured by a market leader.

With 4 different models, Aquadeck caters for every pool configuration: manual, mains, battery or solar.

Read on to discover which model would be best for your pool.

Become an ecocitizen

By keeping your pool clean and reducing filtration time, Aquadeck saves on energy and on pool chemicals.

Because Aquadeck reduces the quantity of water treatment products necessary, it lessens your pool's ecological impact on the environment.

Lastly, as part of its overall environmental design, the PVC that makes up your cover can be recycled. With Aquadeck, you get cutting edge technology and reduce your environmental footprint.

- **UP to 100 kg per m²**

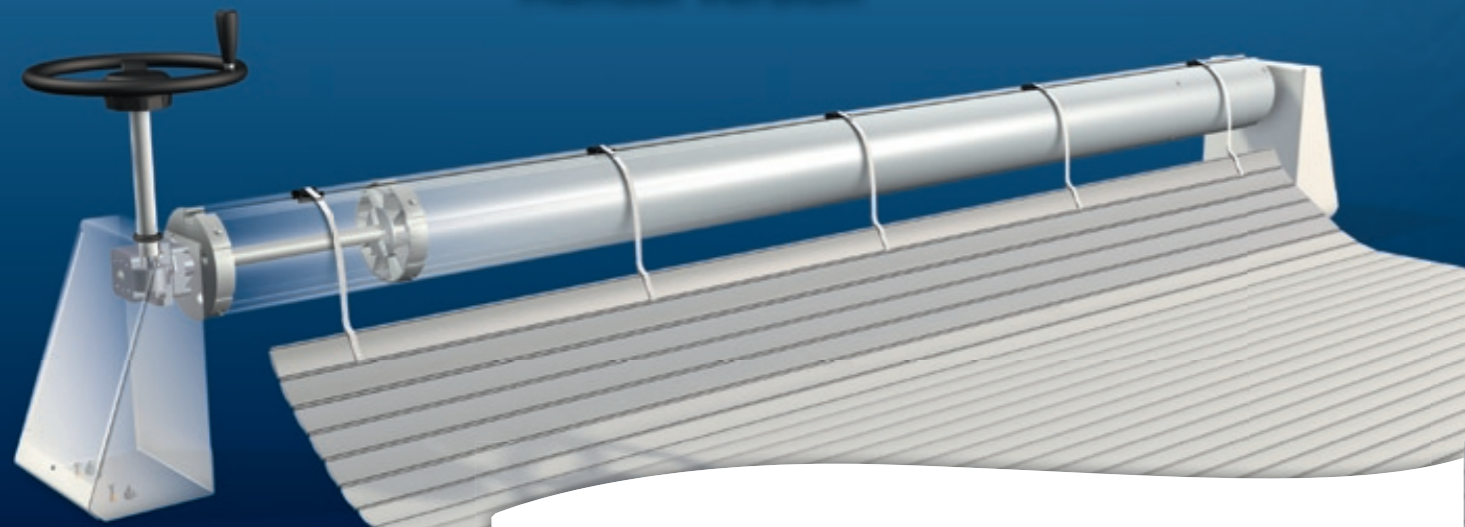

Featuring three air cells per slat, and an anti-deflection system that limits inclination of the slats, it is the outright winner in every flotation category.

Aquadeck *EM*

Manual version

A wide choice of colours for your slat cover

- Aquadeck offers a choice of 4 slat colours. Choose yours.

Manual operation

Fast, easy to install and very economical. No wiring required.

The cover is rolled out effortlessly by hand using a removable fly wheel fitted with a reduction gear.

Delta Lock safety fasteners

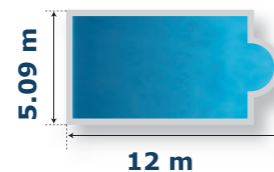

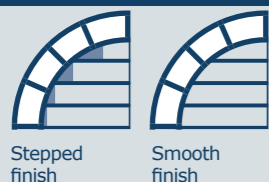

- A wide choice of colours for your Delta Lock safety fasteners.

8 Delta Lock fastener colours are available: Light Blue, Dark Blue, White, Caribbean Green, Beige, Grey, Anthracite grey, Black.

Steps

- Delta covers can be made to fit straight steps, roman steps, even free-form steps. Two type of finish are available, stepped or smooth.

Maximum dimensions (steps included)
5.09 m x 12 m

Aquadeck *EB*

Battery version

A wide choice of colours for your slat cover

- Aquadeck offers a choice of 4 slat colours. Choose yours.

Battery powered motorised operation

Innovative, simple to install and very practical.

No cables need to be run, no wiring to the mains required. Installation does not entail any major masonry work or damage to existing structures.

Delta Lock safety fasteners

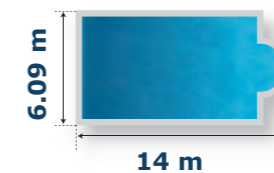

- A wide choice of colours for your Delta Lock safety fasteners.

8 Delta Lock fastener colours are available: Light Blue, Dark Blue, White, Caribbean Green, Beige, Grey, Anthracite grey, Black.

Steps

- Delta covers can be made to fit straight steps, roman steps, even free-form steps. Two type of finish are available, stepped or smooth.

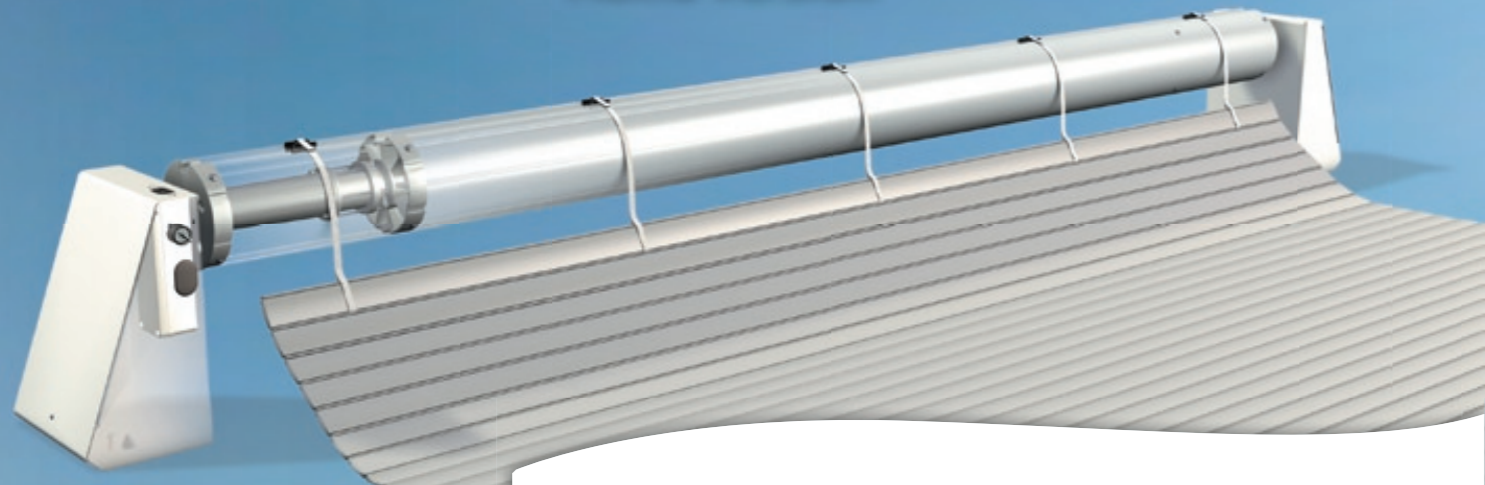

Maximum dimensions (steps included)
6.09 m x 14 m

- Superb operation autonomy (30 open/close cycles between recharges)
- Rolls the cover up in less than 2 minutes (pool 10x5m)
- Comes with a leaktight charger
- Low battery warning (buzzer)
- Push button operation

Stepped finish

Smooth finish

Aquadeck *E series*

- **Ultrasonically welded end plugs: watertightness guaranteed**
- **Beautiful, down to the finest detail: end plug colours match the slat colours.**
- **Aquadeck covers are made of high quality PVC that confers excellent strength, despite the thin air cell walls.**

Unique slat design

The best air volume/ slat thickness ratio available on the market

Some of the most important advantages offered by Aquadeck covers are a result of this unique slat design; a large volume of air trapped inside the minimum amount of plastic.

The benefit is three-fold:

- Firstly, the air volume/slat thickness ratio ensures excellent cover buoyancy compared to other covers with thicker slats, this increased buoyancy limits the displacement and evacuation of water when the cover is deployed.

- Furthermore, the slats are absolutely leaktight, water cannot enter the air cells. The air trapped inside is thus static and dry, guaranteeing optimum thermal insulation.

- Lastly, because the slat cover is extremely buoyant, it has an excellent load bearing capacity and can easily support the weight of a grown man.

Maintenance made easy

Delta covers require little maintenance; they are designed to stay clean. When it comes to winterizing, Delta facilitates your life even further: the motor block on the motorised models is very light and can be removed with no tools in just a few seconds.

Summer and winter, Delta, offers the best possible protection.

Legal information

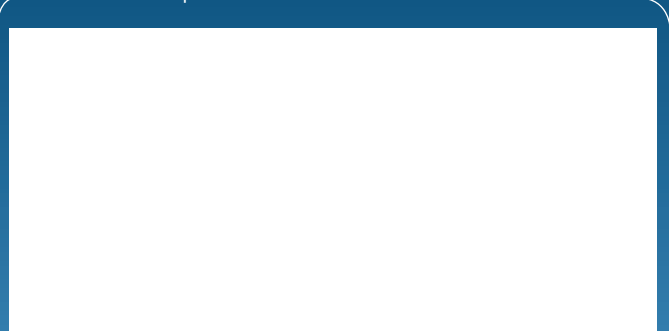

All DELTA covers comply with the French standard NF P 90-308 (May 2004 version concerning pool protection) if all items comprising the cover are supplied by Procopi.

Pool safety cover intended to deny children under five access to the pool.

This cover is no substitute for common sense or individual responsibility. Nor is it intended to replace the vigilance of parents and/or responsible adults that remains the key factor in ensuring the safety of young children.
